KSL WEALTH WEEKLY

Let Your Money Grow Confidently!

STOCKS	СМР	BIAS	TRADING/ INVESTMENT STRATEGY
ADANI PORTS	741	Positive	Adani Ports & Special Economic Zone (APSEZ) is the largest commercial port operator and also into logistics and Special Economic Zone. The firms' flagship Mundra port is India's largest commercial port and acquisition of new ports such as Krishnapatnam, Gangavaram and Dighi will help APSEZ create the capacity and would provide thrust to APL's ambition of higher market share. Geographically, nearly 76% of APSEZ's capacity is on the west coast of India while 24% is on the east coast. A potential entrance exists at CMP, targeting 787/807 mark and then aggressive targets at 857 mark. Holding Period: 3-5 Months+. Stop at 687.
BANK OF BARODA	88	Positive	Bank of Baroda is an India's nationalised bank and financial services company with 8,192 branches in India and 99 overseas offices across 20 countries. The bank merged with Vijaya Bank and Dena Bank, effective 1st April 2019. Bank of Baroda (BOB) reported a strong earnings performance, supported by a healthy core operating performance, despite sluggish business trends. Domestic NIM grew 15.8% YoY. Access to low cost borrowings and sufficient liquidity will help improve income growth. Asset quality trends were stable sequentially in a challenging environment. Establish buy position between 82-85 zone, targeting psychological 100 mark and then at 111 mark. Stop below 75. Holding Period: 1-3 Months.
GALAXY SURFACTANTS	3391	Positive	Galaxy Surfactants is India's leading manufacturer of surfactants and specialty care ingredients for the Home and Personal Care industry. Company's products find application in personal care and home care products, including skin care, oral care, hair care, cosmetics, toiletries and detergent products. 9/10 Indian Consumers use Products which have Galaxy's surfactants or specialty care products atleast once in their Daily Routine. The firm is serving 1750 clients and has presence in across 80+ countries. Galaxy Surfactants revenue share as on FY20 was a) Performance Surfactants (61%), b) Specialty Care Products (39%). The key positive catalyst continues to be the 55% of the revenue mix that comes from MNCs and most importantly, healthy return ratios (ROCE of 25% plus) coupled with robust earnings growth(13% CAGR over FY19-21E). Simply buy at CMP, and on dips between 3125-3150 zone, targeting 3601/3751 mark and then aggressive targets at psychological 4001 with stop below 2869.
SAIL INDIA	115	Positive	Incorporated in the year 1973, SAIL has a market cap of Rs 47460 Crore and operates in Metals - Ferrous sector. The key positive catalyst in favor of the stock is the firms' higher operating leverage due to high conversion cost, the strength in China HRC export price, tight demand supply scenario in the domestic market, backward integrated with captive iron ore, permission from government to sell 25% of Iron ore production of previous fiscal and iron ore fines accumulated as waste over past 5-6 decades, and also demand from Railways which should keep its average NSR higher. Establish buy positions at CMP , and on dips between 100-105 zone, targeting 139/153 mark and then aggressive targets at psychological 175 mark. Stop 89. Holding period 2-3 months.
SBI CARDS	1139	Positive	Incorporated in 1998, SBI Cards is subsidiary of State Bank of India (69.3% stake) and is second largest credit card issuer in India and operates in more than 130 cities in India. The positive catalyst in favor of the stock price is the rapid growth in digital payments on backdrop of large customer base from SBI that is likely to drive growth in credit cards over long-term. Its in a high margin business with strong return ratios, +5% RoA and +25% RoE and SBI Cards commanding market share in terms of cards issued is 19.2%. Simply buy at CMP, targeting 1251 and then aggressive targets at 1327-1351 zone with stop below 929.

Analyst's Pick: ADANI PORTS (CMP 741). Target: 807.

Adani Ports and Special Economic Zone Limited (APSEZ) is the largest commercial ports operator in India accounting for nearly one-fourth of the cargo movement in the country. Its presence across 13 domestic ports in seven maritime states of Gujarat, Maharashtra, Goa, Kerala, Andhra Pradesh, Tamil Nadu and Odisha presents the most widespread national footprint with deepened hinterland connectivity.

The Company's integrated services across three verticals, i.e. Ports, Logistics and SEZ, has enabled it to forge alliances with leading Indian businesses making APSEZ an undisputed leader in the Indian port sector.

The positive catalysts in favor of the stock price are:

- Geographically, nearly 76% of APSEZ's capacity is on the west coast of India while 24% is on the east coast.
- APSEZ's strong logistic network enables seamless movement of cargo. Diversified cargo mix and increased efforts towards east coast (26%) and west coast (74%) parity derisks APL's portfolio from concentration and volatility risks. APSEZ has the capacity as well as ability to handle multiple cargo at its ports.
- APSEZ has a large land bank of 8,481 hectares of contiguous land at Mundra with requisite approvals and clearances in place.

- APSEZ is planning to invest in building multi modal logistics parks (MMLP) by increasing the number of MMLPs from five currently to 15 by Fy26.
- APSEZ is aggressively exploring increasing its warehousing capacity from 0.4 million square feet (msf) in FY21 to 30 msf by FY26.

Technically, brace yourselves for a major rebound play on the daily charts from a classic 'higher consolidation pattern' breakout on the weekly charts. An impulse uptrend is seen forming on the weekly time scale, with positive SAR series, major confirmation above its September 2021 intermediate-highs at 786 mark.

Add to that a bullish divergence and a rising stochastic signal (on weekly charts) with recent increase in volumes signaling a larger rebound. The 200 days Exponential Moving Average (EMA) of the stock on the daily chart is currently at 669 zone.

A potential entrance exists at CMP, targeting 787/807 mark and then aggressive targets at 857 mark. Holding Period: 3-5 Months+. Stop at 687.

From KSL Research Desk...

The Week That Was: Nifty moves closer to 18000 milestone.

Sensex: 60059. Nifty: 17895.

The positive takeaway from last week's trade was that the benchmark indices took in their stride inflation fears and rising crude oil prices as Nifty bounced 2.07% and Sensex too ended 2.2% higher for the week ended.

The key positive catalyst:

- 1. Positive global cues
- 2. Moody's shifting India's rating outlook to stable from negative.
- 3. A global energy crunch eased Russia offered help to alleviate a European power crisis.
- 4. The acceptance that Evergrande may not take down the global financial system.

The up move was seen despite:

- 1. Rise in oil prices. WTI Oil prices have reached seven-year highs ---- above \$78.00 on OPEC+ agreement. OPEC+ left the 400,000 barrels per day agreement unchanged. Rise in oil prices could choke the recovery from the pandemic. As a result, WTI Crude oil ended near \$80 a barrel mark at \$79.58.
- 2. RBI Governor Shaktikanta Das quoted that growth is yet not at pre-pandemic levels as he addressed the press in light of RBI Monetary Policy interest rate decision.
- 3. Reports of China-America trade tensions that are intensifying
- 4. US Treasury yields were seen increasing. Ten-year U.S. Treasury yields rose to as high as 1.6%, their highest since June when they touched the same level, ahead of the payrolls release.
- 5. FIIs were net sellers for the week at Rs. 3686 crores.
- 6. The Indian Rupee dropped to its lowest level since April, while the 10-year benchmark bond closed at its weakest in nearly a year-and-a-half, as a spike in global crude oil prices re-ignited concerns over imported inflation.
- 7. Stubbornly high inflation across globe that could raise pressure on central banks to withdraw stimulus. Surging inflation prospects in the U.S which is also supported by the Federal Reserve's signaling of a near-term slowdown in the pace of its \$120 billion in monthly bond purchases. The Federal Reserve and ECB are seen cautiously moving towards trimming their massive stimulus programs.
- 8. The street suspects that the Fed could announce a sooner-than-expected rate hike.

Back in the States, the U.S. economy created jobs at a much slower-than-expected pace in September, a pessimistic sign about the state of the economy though the total was held back substantially by a sharp drop in government employment.

Nonfarm payrolls rose by just 194,000 in the month, compared with the Dow Jones estimate of 500,000, the Labor Department reported Friday. But, the unemployment rate fell to 4.8%, better than the expectation for 5.1% and the lowest since February 2020.

For the week ended, the Dow was up 1.22% at 34746, Nasdaq was down 0.09% at 14579.50 while S&P500 was up 0.79% at 4391.36.

Back in our stock markets, Nifty Midcap 50 index flared up +4.0% at 8592 and NSE Smallcap Index was up 3.68% at 11305.70. Hence, both the indices again totally outperformed the benchmark Nifty/Sensex.

On the sectoral front, barring BSE FMCG Index, all the other indices ended in green with BSE Consumer Durables Index, BSE Auto Index & BSE Oil & Gas Index emerging as top three gainers, up 6.3%, 4.2% & 3.7% respectively.

Stock specific, ONGC, M&M & TITAN were amongst top weekly gainers, up 11.4%, 9.3% & 9.2% respectively. Bajaj twins, RIL hit fresh all-time highs. On the losing side, KOTAKBANK, NESTLE & HUL lost 3.4%, 2.3% & 2.2% respectively for the week ended.

Let's now have a look at other catalysts from last week:

- # Reserve Bank of India (RBI) maintained status quo in its bi-monthly Monetary Policy meeting scheduled on October 8. The six-member Monetary Policy Committee (MPC) of India's central bank kept the key lending rate repo rate unchanged at 4% for the eighth time in a row. Reverse repo rate remained unchanged at 3.5%. The policy stance will also kept unchanged at 'accommodative'. The MPC voted 5-1 to retain the accommodative stance as long as necessary to sustain growth on a durable basis, while ensuring that inflation remains within the target, RBI Governor Shaktikanta Das. RBI retained FY22 GDP growth forecast at 9.5%.
- # Tata Consultancy Services (TCS) post market hours on October 8 reported a consolidated net profit of Rs 9,624 crore for the quarter ended September 2021 (Q2FY22), registering a 14.1% year-on-year (YoY) growth. TCS posted consolidated revenue during the July-September period at Rs 46,867 crore, up 16.8 percent over a year-ago quarter.
- # Fitch Ratings has cut India's economic growth forecast to 8.7 per cent for the current fiscal but raised GDP growth projection for FY23 to 10 per cent, saying the second COVID-19 wave delayed rather than derail the economic recovery.
- # GST collections remained strong and topped Rs 1.17 lakh crore in September, which was 4.5% more than the previous month and 22.5% higher than a year ago.
- # Advance tax numbers came in very strong for India Inc. and corporate profitability is expected to remain strong for the second quarter.
- # Gold Prices were muted last week, down 0.07% \$1757.25 an ounce.
- # Indian rupee too lost heavily, down 1.35% against US dollar at 75.131 for the week ended.

The Week Ahead: All eyes will be on Q2 earnings of INFY, Wipro and Mindtree.

The benchmark Nifty is likely to tread water as we start a new a week of trading primarily on backdrop of little in the way of strong bullish direction: Blame the uninspiring start to:

1. A weak Friday's U.S employment report. The job numbers were dismal as the US reported an increase of only 194,000 jobs in September, below 500,000 expected. The only silver lining is that this data may allow the Fed to delay tapering its stimulus program which this equity bull market has become increasingly reliant on.

Honestly speaking, the bad data should ideally not really be comforting the bulls as the NFP hints an early sign of dreadful stagflation in the U.S. We suspect, the US may be headed for slowing growth but rising inflation. Please note, the ten-year U.S yield marched higher and traded above the 1.6% now, a multi-month high.

Long story short: The data suggests the U.S economy is not out of woods yet.

2. TCS missed on all fronts but here the only silver lining is that the Management guided that demand environment is strong and is sustainable over the medium term. TCS numbers were largely below the street estimates as analysts on the street had estimated profit at Rs 9,731 crore on revenue of Rs 47,466 crore for the quarter under review. We expect, TCS to trade in the wide range of 3700-4200 zone in the near term.

The week is holiday-shortened week on account of Dusshera on Friday, Oct 15th. We suspect, bulls likely to gain strength only above Nifty's all-time high at 17947 mark.

Expect Dalal Street to open strongly higher but the week could turn out to be choppy with Nifty displaying a bout of volatility. It's understandable if investors turn skittish on any interweek strength amidst:

Commanding attention would be the Oil prices which jumped to nearly three-year high levels due to rising demand with the increasing travel and tourism activities globally amid reducing Covid fear, when there is limited supply due to supply curbs by OPEC+ countries. Spiking oil prices are the biggest negative catalyst for Indian economy as we are net oil importer. Oil prices are likely to stay firm in the medium term with aggressive targets at \$85-\$90 zone. The Organization of the Petroleum Exporting Countries and allies will meet on Monday to discuss the output plans.

The rising oil prices, buying demand for greenback and expected FII outflow amid likely Fed tapering sooner than later, along with Friday's subdued close at Wall Street are likely to be the key theme at Dalal Street.

Commanding attention this week would be Q2 earnings report which is accompanied by the caveat of rising costs and supply chain issues. We are likely to hear more of this in the Q3 earnings season. Meanwhile, investors will spy with one big eye on INFY's Q2 toi trickle in on 13th of October 2021.

Q2 earnings to trickle in this week:

Monday, Oct 11th: DELTACORP.

Wednesday, Oct 13th: WIPRO, MINDTREE, INFY, DISHTV.
Thursday, Oct 14th: CENTURYTEX, HCLTECH, IBREALEST.

Technically speaking, the biggest make-or-break support for Nifty seen at 17327 mark. Please note, Nifty will be vulnerable below 17451 mark with aggressive downside risk at 17011 and then at 16779-16900 zone. Please note, Nifty's 200 day EMA is still at 15475 mark.

So, the line in the sand is Nifty's 17451 support. **Alternatively, if Nifty's 17451 support holds then we suspect Nifty still has the fire power to touch the magical 18000 mark.** In this scenario, a bullish breakout will be the probable theme as the backdrop of recent sequence of higher high/low is still intact on weekly and monthly-time-frames.

The options data for October series suggests Nifty is likely to be in a trading range of 17500-18300 zone. Maximum Call OI is at 18000 followed by 17800 strike price. So, the 18000 mark will be Nifty's crucial resistance zone. Maximum Put open interest stands at 17000 levels followed by 17500 levels. Call writing was seen at 17800 and then at 18300 strike price, while there was meaningful Put writing at 17800 and then at 18500 strike prices.

India VIX, which measures the expected volatility in the market, cooled off to 15.65.

Preferred trade for the week:

- # **Nifty (17895):** Buy on dips between 17700-17750 zone, targeting 18001 mark and then at 18251-18351 zone. Strict stop at 17361.
- # **Bullish Sectors:** PSU BANKS, AUTO, BANKS.
- # Bearish Sectors: MEDIA.
- # **BULLISH STOCKS:** ADANI ENTERPRISES, ADANI PORTS, NIPPION LIFE, TATA MOTORS, HINDALCO, INDIA CEMENT, SBI, BANK OF BARODA, CANARA BANK, PNB, NAZARA TECHNOLOGIES, MARICO, TATA CHEMICALS, PIDILITE, SAIL, LARSEN.
- # **BEARISH STOCKS:** AUROBINDO PHARMA, RBL BANK.

In the international front, all eyes will be on Fed minutes to trickle in on 13th October 2021 post our market close. The September trade numbers for China and the U.S CPI data for September will trickle in on 13th October.

Before we end, our most preferred pair strategies:

Pair Strategy: Long DIVIS LAB and Short AUROBINDO PHARMA.

Pair Strategy: Long COFORGE and Short OFSS.

Long HINDALCO and Short NMDC.

NIFTY AUTO Index vs NIFTY

• NIFTY AUTO Index: 11079: OUTPERFORM.

- In last week's trade, Nifty Auto index was seen trading with positive bias and the positive takeaway was that Auto index ended the week on a positive note. Auto index ended the week with 4.55% gains as against Nifty's gains of 2.07%. Going forward, we suspect Auto index likely to consolidate and buying on any weakness should be the preferred strategy. Technically, Downside well supported at 10141 mark. Major hurdles seen at 10967 mark. Above 10967 mark, Auto index will aim for all-time-highs at 12052 mark.
- **Support:** 10725/10501/10005.
- Resistance: 11457/12052/13101.

All level indicated above are based on cash market prices. Pivot Point

PP: Pivot Point : This is trigger point for weekly buy/sell based on the price range of the previous week.
R1: Resistance one : 1st Resistance over PP. R2 : Resistance two : 2nd Resistance over R1.
S1: Support one : 1st support after PP. S2 : Support Two : 2nd support after S1.

As per the tool, the trader should take BUY position just above PP and keep the stop loss of PP and the first target would be R1. If R1 is crossed then R2 becomes the next target with the stop loss at R1.

Similarly if price goes below PP the trader should SELL and keep the PP as Stop loss and the first target would be S1. If S1 is crossed then S2 becomes the next target with the stop loss at S1. This is a trading tool. The key to use of this tool is the use of STOP LOSS.
