Good Morning Early Readers!

Well, bears seen everywhere at Dalal Street as long unwinding continues to be the preferred theme. Blame it to soaring inflation and slowing economic growth which have become global trends. Fed rate hike speculation is also seen weighing on sentiments at Dalal Street.

The street also anxious amidst reports that the RBI may start a tightening policy from December itself and that could reduce the liquidity available in the market.

Technically speaking, immediate downside risk for Nifty seen at 17613 mark. Please note, Nifty is set to stumble further below the 17613 mark with aggressive downside targets at 16907 mark. Bulls' will now get conviction of strength only above Nifty 18057 mark.

Bank Nifty: Bank Nifty was seen trading with negative bias in last week's trade. More corrective declines on cards only below 38001 which could trigger waterfall of selling towards 37456 mark. We suspect, Bank Nifty to mildly underperform Nifty.

The Nifty options data for November series suggests Nifty is likely to be in a trading range of 17300-18000 zone. Maximum Call OI is at 18000 followed by 18500 strike price. So, the 18000 mark will be Nifty's crucial resistance zone. Maximum Put open interest stands at 17500 levels followed by 17400 levels. Call writing was seen at 18600 and then at 17900 strike price, while there was meaningful Put writing at 17300 and then at 17000 strike prices.
