Good Morning Early Readers!

SGX Nifty in early action is seen trading water amidst hawkish Fed minutes:

Minutes from the November Fed meeting show members concerned about inflation and willing to tighten policy should it continue to run hot.

The meeting summary noted that the officials would be willing to raise interest rates "sooner than participants currently anticipated."

They also indicated at the meeting that they feel conditions warrant a reduction in monthly asset purchases, with some members pushing for a more aggressive tapering.

Technically speaking, Nifty's inter-month downside risk seen at 16,871 mark. Expect waterfall of selling only below Nifty 17216 mark

Bulls' will now get conviction of strength only above Nifty 17881 mark. So, until 17881 mark is resistance, volatility will be hallmark and the perma-bulls should strictly not assume any intraday strength as a buying opportunity.

The Nifty options data for November series suggests Nifty is likely to be in a trading range of 17000-18000 zone. Maximum Call OI is at 18000 followed by 17500 strike price. So, the 18000 mark will be Nifty's crucial resistance zone. Maximum Put open interest stands at 17000 levels followed by 17300 levels. Call writing was seen at 17500 and then at 17600 strike price, while there was meaningful Put writing at 17100 and then at 17000 strike prices.
