

If yesterday's trading action is any indication, then we suspect – Nifty is likely to struggle to make sizable gains from here.

Nifty is likely to trade volatile and choppy for the day. Profit booking could be the probable theme.

Daily Research Reports

Good Morning & Welcome to Thursday's trading session at Dalal Street, dated 17th November 2022.

This morning, SGX Nifty is seen trading water, indicating Nifty will struggle for direction in today's trade.

Well, that's in-line with our call of the day which suggests - if yesterday's trading action is any indication, then we suspect – Nifty is likely to struggle to make sizeable gains in today's trade.

The 5-big headwinds:

1. San Francisco Federal Reserve President Mary Daly's statement that the Fed isn't ready to pause rate hikes yet and that it could lift the federal funds rate by more than a full percentage point from here.
2. A possible escalation of the war in Ukraine. White House has stated that ultimately - Russia is responsible for tragic incident in Poland.
3. Muted action from FIIs in last two trading sessions.
4. Another report on rising Covid infections on China.
5. Technically, overbought conditions prevail – Slight profit booking in Nifty could be the order of the day.

The line in the sand is Nifty's support at 18277. Bank Nifty's make-or-break intraday support at 42000.

The 2-positive catalysts:

1. Signs of cooling US inflation.
2. A sluggish Crude Oil price below \$ 85 a barrel.

Outlook for Thursday: Nifty may hit the pause button.

Another report on rising Covid infections on China are likely to tone down on the bullish sentiments in today's trade.

The negative shift in sentiments is also on backdrop of the upbeat US Retail Sales data that seems to be helping the US Dollar find some demand. The King US Dollar index was last seen hovering at 106.50 levels.

The US Treasury yields fell on Wednesday were trading steady with the 10-year Treasury yield falling to 3.712%. The yield on the 2-year Treasury pegged at 4.37%.

ECONOMIC CUES:

India's retail inflation has eased to a three-month low at 6.77% in October as food inflation decelerated.

That said, the easing is unlikely to force a pause in the RBI's rate hiking cycle.

Retail inflation has remained outside of the central bank's Monetary Policy Committee's tolerance band of 2-6 per cent for more than three successive quarters, marking the panel's failure to achieve its legally-mandated inflation target.

GLOBAL STOCK MARKETS:

The Dow Jones Industrial Average traded subdued overnight after stronger-than-expected retail sales data from the Commerce Department.

The producer price inflation slowed to 8% last month, well south of the Street consensus forecast and more than three percentage points lower than the multi-decade highs reached in March of this year.

Last week, Dow Jones had a great week (up 4.15%), along with its counterparts Nasdaq and S&P 500 witnessing an upside of 8.10% and 5.90% respectively.

Pivot Point

PP : Pivot Point : This is trigger point for buy/sell based on the price range of the previous week.
R1 : Resistance one : 1st Resistance over PP. R2 : Resistance two : 2nd Resistance over R1.
S1 : Support one : 1st support after PP. S2 : Support Two : 2nd support after S1.

As per the tool, the trader should take BUY position just above PP and keep the stop loss of PP and the first target would be R1. If R1 is crossed then R2 becomes the next target with the stop loss at R1.

Similarly if price goes below PP the trader should SELL and keep the PP as Stop loss and the first target would be S1.

If S1 is crossed then S2 becomes the next target with the stop loss at S1. This is a trading tool. The key to use of this tool is the use of STOP LOSS.
