

The front pages suggest two big headwinds:

Daily Research Reports

Good Morning & Welcome to Friday's trading session at Dalal Street, dated 18th November 2022.

In early action, SGX Nifty is seen treading water, indicating Nifty will struggle for direction in today's trade.

Well, if last two days' trading action is any indication, then we suspect – Nifty is likely to trade volatile and choppy in today's trade, and probably with a slight negative bias.

Blame it to fading investors' enthusiasm about a potential slowdown in interest-rate hike from the Federal Reserve.

The global cues are negative this Friday morning after St. Louis Fed President James Bullard said that the federal funds rate could reach 7%, which is above current market expectations. He also added that recent rate hikes have only had a limited impact on inflation so far and the Fed has more work to do in lowering the rate of inflation.

The other key headwinds:

- 1) North Korea warns the US that it will face ruthless military activity against its joint drills in its region.
- 2) Investors were also wait for more clarity on Russian military attacks on Poland as statements from US President Joe Biden and Polish President Andrzej Duda has created vagueness.

Outlook for Friday: Buy on dips should be the preferred strategy.

We will spy with one big eye if investors will look to celebrate the 3-big positive catalysts:

- 1) The tumbling US Dollar index (down around 7% to 107 levels) from the multi-decade peak of 114 hit on the backdrop of Fed's fight against inflation.
- 2) A sluggish Crude Oil price below \$84 a barrel.
- 3) Nifty should also blossom as FIIs are seen making a solid comeback to Indian markets.

After 2-days of muted action, FIIs in yesterday's trade bought shares worth Rs. 618 crores.

This November, FIIs have bought to the tune of Rs. 13,590 crores.

ECONOMIC CUES:

India's retail inflation has eased to a three-month low at 6.77% in October as food inflation decelerated.

That said, the easing is unlikely to force a pause in the RBI's rate hiking cycle.

Retail inflation has remained outside of the central bank's Monetary Policy Committee's tolerance band of 2-6 per cent for more than three successive quarters, marking the panel's failure to achieve its legally-mandated inflation target.

GLOBAL STOCK MARKETS:

Overnight, US stocks mostly traded with negative bias amid concerns that the Federal Reserve will continue its aggressive rate hikes in the months ahead. Modest advance in Treasury bond yields were also witnessed as investors debated the impact of solid retail sales data on the broader inflation dynamic in the world's largest economy.

James Bullard, the St. Louis Federal Reserve President, told an event in Louisville that this year's rates hikes, which have included four consecutive increases of 75 basis points in the Fed's benchmark rate, "have had only limited effects on observed inflation."

The current rate, which sits between 3.75% and 4%, is well below the "sufficiently restrictive" level the Fed needs to reduce inflation, Bullard said.

RECAP OF PREVIOUS DAY'S TRADING SESSION:**Nifty ends on a negative note as geopolitical risk aversion escalates.**

Nifty (-66, 18344).

Sensex (-230, 61751)

For most of the session, Nifty was seen trading flat - bouncing between positive and negative territory but the benchmark witnessed steep fall towards the end of the session after North Korea warns the US that it will face ruthless military activity against its joint drills in its region.

Investors were also seen spying with one big eye for more clarity on Russian military attacks on Poland as statements from US President Joe Biden and Polish President Andrzej Duda has created vagueness.

Long story short: Profit booking was the theme amidst overbought technical conditions.

Pivot Point

PP : Pivot Point : This is trigger point for weekly buy/sell based on the price range of the previous week.
 R1 : Resistance one : 1st Resistance over PP. R2 : Resistance two : 2nd Resistance over R1.
 S1 : Support one : 1st support after PP. S2 : Support Two : 2nd support after S1.

As per the tool, the trader should take BUY position just above PP and keep the stop loss of PP and the first target would be R1. If R1 is crossed then R2 becomes the next target with the stop loss at R1.

Similarly if price goes below PP the trader should SELL and keep the PP as Stop loss and the first target would be S1.

If S1 is crossed then S2 becomes the next target with the stop loss at S1. This is a trading tool. The key to use of this tool is the use of STOP LOSS.
