Daily Research Reports

Good Morning & Welcome to Tuesday's trading session at Dalal Street, dated January 24th 2023.

Nifty is likely to be on the rise as traders gear up for busy day of earnings from Colgate-Palmolive, HDFC Asset Management, Maruti Suzuki, Pidilite, TVS Motors, and United Spirits.

We suspect, IT and Banking stocks likely to continue their recent outperformance amidst improving technical structure.

Nifty's technical landscape will improve considerably if the benchmark moves above 18265 mark. Please note, a move above 18265 should open up further gains to 18475 mark.

Stay bullish as long as Nifty's 17925 support is held.

Outlook for Tuesday: Positive start.

Nifty will aim for more gains as large part of Asia are off for Chinese New Year and yesterday's strong close on Dalal Street should ideally lead to more gains.

That brings us to our call of the day which suggests recent cautious market mood was seen limiting the enthusiasm at Dalal Street.

Hopefully, after robust Q3 results from Axis Bank, Canara Bank and IDBI Bank-sentiments should pick up.

Actually, the relentless selling by FIIs into Indian equities does not allow Nifty to gain traction despite some inspiring Q3 performance from corporate India.

Foreign institutional investors this month, have already sold to the tune of Rs. 20,100 crores.

Meanwhile, traders across globe are also waiting for the first Federal Reserve meeting of the year to trickle in on February 1st and hoping that interest rates will be hiked only by 25 basis points.

So, commanding attention will be on the first estimates for the fourth quarter of 2022 US GDP data due on January 26, to know the progress in the world's largest economy amid continuing rate hike cycle by the Federal Reserve. The Fed has been raising rates since the start of this financial year, taking the targeted range to 4.25-4.5 percent in the December policy meeting. In the last quarter, which was October-September period, the US economy registered a 3.2 percent growth, which was better than the second estimates of 2.9 percent. The growth was after contraction for previous two quarters.

Traders brace for a busy week with releases from US that shall command attention will be the Q4 GDP growth rate, durable goods orders, the PCE price index, personal income and spending.

All eyes will be on Finance Minister Nirmala Sitharaman who will present Union Budget for 2023-24 in the Lok Sabha on February 1st. The street is betting that FM will keep on the path of fiscal consolidation and opt for narrowing the FY24 fiscal deficit to as low as 5.8% in the upcoming Budget.

ECONOMIC CUES:

- # The Boston Fed President Susan Collins was the latest policymakers to keep her foot on the pedal to warn that rates must rise further to bring down inflation
- # St. Louis Fed President Jame Bullard too was hawkish as he said that the Federal Reserve should not "stall" on raising its benchmark rates until they are above 5%.
- # ECB President Christine Lagarde who at the World Economic Forum in Davos has said that 'Inflation is way too high, will stay course with rate hikes'.

GLOBAL STOCK MARKETS:

Wall Street rose in Monday's trade amidst strengthening optimism about a slowdown in the pace of interest-rate hikes from the Federal Reserve.

Equities were gaining on the hope that the Fed is moving toward ending or slowing down its aggressive tightening campaign that hurt stocks last year.

As of Monday, 99.8% traders were betting that the Fed increases rates by 25 basis points at its next meeting on Feb.1 versus a prediction of 93.7% earlier this month, according to the CME FedWatch Tool.

The Fed hiked rates seven times last year to set the target federal funds rate at 4.25% to 4.50%. The last rate hike of 50 basis points in December was a step down from the prior 75 basis point increases.

PP : Pivot Point : This is trigger point for weekly buy/sell based on the price range of the previous week.
 R1 : Resistance one : 1st Resistance over PP. R2 : Resistance two : 2nd Resistance over R1.
 S1 : Support one : 1st support after PP. S2 : Support Two : 2nd support after S1.

As per the tool, the trader should take BUY position just above PP and keep the stop loss of PP and the first target would be R1.
 If R1 is crossed then R2 becomes the next target with the stop loss at R1.

Similarly if price goes below PP the trader should take SELL and keep the PP as Stop loss and the first target would be S1.

If S1 is crossed then S2 becomes the next target with the stop loss at S1.
 This is a trading tool. The key to use of this tool is the use of STOP LOSS.
