

Nifty is likely to trade volatile and choppy with big support at 19471 mark.

The negative catalyst: The US Dollar (106.85) remains strong, supported by higher 10-year Treasury yield spiking at 4.70%, a level not seen since 2007.

The 2-good news:

- 1) The GST collections climbed 10.2% year-on-year in September to Rs 1.63 lakh crore.
- 2) The US legislators were able to come to a temporary agreement that would keep the government open for 45 more days.

Daily Research Reports

Good Morning & Welcome to Tuesday's trading session at Dalal Street, dated October 3rd 2023.

There are two good news as we start this week's trading:

- 1) The gross GST revenue collected in the month of September, 2023 came in at 1,62,712 crore. The government's Goods and Services Tax (GST) collections climbed 10.2% year-on-year in September to Rs 1.63 lakh crore.
- 2) The sentiments have improved considerably after the US legislators were able to come to a temporary agreement that would keep the government open for 45 more days, an extended period that lawmakers can use to finalize funding legislation.

Meanwhile, it was a September to remember — as despite being a tough month, the benchmark Nifty managed to go north-way as was up 2%.

Nifty's performance stood out as India was the only country where there is positive momentum in terms of growth and economic activity compared to other emerging and developed markets

Nifty's September performance stood out as India was the only country where there is positive momentum in terms of growth and economic activity compared to other emerging and developed markets.

Bottom-line: It's time to put on your Nifty rally cap!

Outlook for Tuesday: Rebound play quite likely.

Nifty is poised to rise as the street will first react to September auto sales numbers which are buoyed by festive demand as domestic car sales hit historic highs in September. The outlook is also promising as automakers will continue to sell aggressively in October, when the peak of the festive season sets in with Navaratri, till Diwali in November.

Focus will immediately shift to the RBI's MPC meeting scheduled for October 4-6, 2023.

The street suspects, the RBI is likely to maintain status quo on policy rates for the fourth time in a row after the US Federal Reserve has decided to keep a hawkish stance for some more time.

At Wall Street, investors will look forward to Friday's jobs report for September.

Analysts expect the economy to add 155,000 jobs for September, down from the 187,000 added in August. The unemployment rate is expected to slip to 3.7% from 3.8%.

ECONOMIC CUES:

As widely expected, Federal Reserve kept the target range for the federal funds rate at a 22-year high of 5.25%-5.5% in its September 2023 meeting, following a 25bps hike in July, and in line with market expectations.

The Federal Reserve Policymakers said that recent indicators suggest that economic activity has been expanding at a solid pace. Job gains have slowed in recent months but remain strong, and the unemployment rate has remained low. Inflation remains elevated. Policymakers now see the fed funds rate at 5.6% this year, the same as in the June projection, while it is seen higher at 5.1% in 2024, compared to 4.6% seen in June.

The market positioning suggests that investors still see a nearly 40% probability that the Fed will opt for one more 25 basis points (bps) interest-rate hike before the end of the year, as per the CME Group FedWatch Tool.

GLOBAL STOCK MARKETS:

Meanwhile, September marked the worst monthly performance of the year for the S&P 500 and Nasdaq Composite, losing 4.9% and 5.8%, respectively. They also ended the quarter down 3.7% and 4.1%, respectively. Moreover, the Dow finished the month 3.5% lower and the quarter 2.6% in the red.
