**ECONOMIC CUES:**

U.S. inflation pressures slowed again last month, Commerce Department data indicated Tuesday, with core consumer prices falling to a fresh two-year low and challenging the Federal Reserve's near-term rate hike forecasts.

The headline consumer price index for October was pegged by the Commerce Department at 3.2%, well south of the prior month's tally of 3.7% and inside Wall Street's 3.3% forecast, powered in part by falling oil and energy prices. On a monthly basis, the index showed inflation was unchanged from September, down from the 0.4% pace recorded last month and the 0.6% gain tallied in August.

So-called core inflation, which strips out volatile components like food and energy, slowed to 4.0%, the lowest in two years, while the monthly reading of 0.2% matched also came inside Street forecasts.

**GLOBAL STOCK MARKETS:**

# At Wall Street, US stocks were seen giving back some November gains in Thursday's trading following weaker-than-expected job market data and a cautious holiday outlook from Walmart.

That said, investors were still enthused by lower-than-expected inflation readings and the likelihood they mark the end of the Federal Reserve's interest-rate increases.

The producer price index for final demand fell 0.5% in October from September. Retail sales slipped 0.1% in October, the first decline from March, but came in better than expectations for a decline of 0.3%.

The 10-year yield was up to 4.45%.

Earlier on Wednesday, the Commerce Department said headline inflation slowed to 3.2%, inside the Street's 3.3% forecast, while core pressures eased to a fresh two year low of 4%.

**RECAP OF PREVIOUS DAY'S TRADING SESSION:**

**Nifty enjoys a strong session as bulls thrilled after reports suggest inflation is down.**

**NIFTY (+90, 19765)****Sensex (+307, 65983)**

Well, amidst the sharp decline on US inflation data, the benchmark Nifty comfortably stretched higher in today's trade.

Amongst sectoral indies, Nifty IT index galloped 2.70%, Nifty Auto and Nifty Pharma too jumped 0.89% each.

The positive takeaway was that the Nifty Mid-Cap & Small-Cap indices scaled fresh all-time-highs.

Meanwhile, helping sentiments were reports of President Joe Biden and Chinese leader Xi Jinping meeting on Wednesday where they agreed to restart direct communications.

**Long story short:** Nifty bulls gain conviction as bullish bets was the preferred theme.

Pivot Point

PP : Pivot Point : This is trigger point for weekly buy/sell based on the price range of the previous week.  
R1 : Resistance one : 1st Resistance over PP. R2 : Resistance two : 2nd Resistance over R1.  
S1 : Support one : 1st support after PP. S2 : Support Two : 2nd support after S1.

As per the tool, the trader should take BUY position just above PP and keep the stop loss of PP and the first target would be R1. If R1 is crossed then R2 becomes the next target with the stop loss at R1.

Similarly if price goes below PP the trader should SELL and keep the PP as Stop loss and the first target would be S1.
