

The biggest headwind for our stock markets is if the Nifty can climb the 'Wall of Worry' of 50% Trump's tariff to come into effect this August 27th?

In yesterday's trade, FIIs turned out to be net sellers to the tune of Rs. 2466 crores.

Technically, Nifty's upside is likely to be capped at 25250 mark and downside risk remains at Nifty's 100 DMA at 24647 mark.

Daily Research Reports

Good Morning & Welcome to Tuesday's trading session at Dalal Street, dated August 26th 2025.

Nifty and Bank Nifty's upside is likely to be capped for the day. An excessive intraday strength could be a mere dead-cat-bounce. Caution shall continue to be the buzzword.

Overnight, the US stocks were seen drifting down

The slight red on the screen was primarily on backdrop of the street reconsidering the magnitude of rate cuts to be delivered by the Federal Reserve in their incoming cycle.

Fed Chair Jerome Powell seems ready to cut interest rates this September but has also said that he will still rely on incoming economic data about inflation and employment.

Powell has also acknowledged "GDP growth has slowed notably" this year.

But the biggest headwind for our stock markets is if Nifty can climb the 'Wall of Worry' of 50% Trump's tariff to come in effect this August 27th?

Meanwhile, the RBI Governor Sanjay Malhotra said on Monday that the Reserve Bank of India will respond with policy measures if the 50% US tariffs (which comes into effect from Wednesday, August 27th) starts to impact domestic economic growth.

Long Story Short: Stay light on any excessive intraday strength on Nifty as profit booking and long unwinding could be the preferred theme.

Makes sense to stay nimble.

Outlook for Tuesday: Nifty's upside is likely to be capped. Caution is likely to be the buzzword.

In yesterday's trade, Nifty gained and reversed Friday's massive losses but digging deeper bulls were still seen non-committed and waiting some big positive trigger.

WHAT TECHNICALS TELLS US

Daily chart of Nifty:

Nifty: In Monday's trade, Nifty started the session on a positive footing and the good thing was that the benchmark stayed in positive territory all thru the trading session.

The Positive takeaway was that Nifty ended above the dotted lines and reversing Friday's sharp fall.

Nifty ended above its 100 DMA 24648 mark.

Nifty's all-time-high continues to be at 26277.35 mark.

The technical landscape suggests Nifty's major support at 24771/24605/24333 mark.

Nifty's hurdles seen 25154/25250/25670 mark.

Nifty's 200 DMA at 24068 mark.

Nifty's chart of the day suggests the benchmark may trade range bound, an up-and-down session is quite likely with Nifty's biggest intraday hurdles at 25250 mark on closing basis. Bias is Neutral/negative.

Daily chart of Bank Nifty:

Bank Nifty: In yesterday's trade, Bank Nifty started the session on a cautious note, and the negative takeaway away was that the benchmark was seen underperforming Nifty's slight rebound action as it ended absolutely flat.

Bank Nifty's all-time now is at 57628.40 mark.

Bank Nifty was seen mostly underperforming Nifty's rebounding action, ending 0.02% lower as against Nifty's 0.39% gains.

Interestingly, Nifty PSU Banks ended 0.25% lower while Nifty Private Bank Index ended with 0.02% gains.

Intraday support for Bank Nifty now seen at 54700/54100 mark and then at 53481 mark on closing basis.

In today's trade and in near term, Bank Nifty is likely to face resistance at 55800/56600/57100 mark. Bank Nifty's 200-DMA is placed at 52878 mark.

ECONOMIC CUES:

Fed Chair Jerome Powell seems ready to cut interest rates in the fall but will still rely on incoming economic data about inflation and employment.

"The effects of tariffs on consumer prices are now clearly visible," the Fed chair said of inflation. At the same time, however, "A reasonable base case is that the effects will be relatively short lived – a one-time shift in the price level." Powell also acknowledged "GDP growth has slowed notably" this year.

According to the CME Group's FedWatch tool, the probability Powell & Co. will cut the target range for the Federal Funds Rate by 25 basis points at the next Fed meeting is 83.1%, up from 75.0% as of August 21.

India's Mutual Funds inflows are at record highs at Rs. 42672 crores as against Rs 23,568 crore in June. So, the good news is that Rs 30,416 crore has come through new fund offerings. Interestingly, Small cap funds were the biggest contributors to the inflows, drawing in Rs 6,484 crore during the month. Also note, SIP is at whopping record highs at 28464 crores.

What is heartening is that the total assets under management (AUM) of the Indian mutual fund industry crossed the Rs 75 lakh crore mark in July 2025, reaching Rs 75.36 lakh crore.

GLOBAL STOCK MARKETS:

US stocks were seen erasing the morning session loss on Monday, maintaining the disconnect between different sectors as markets reconsidered the magnitude of rate cuts to be delivered by the Fed and how tariffs will impact goods producers.

The S&P 500 and the Nasdaq 100 were marginally above the flatline, while the Dow lost 200 points.

Fed Chairman Powell noted on Friday that a weakening labor market could warrant a rate cut in the Fed's September meeting if jobs and price data refrain from showing surprises. Still, concerns of high inflation voiced by other FOMC members prevented a sharper rally for equities.
